THE INOAC DIFFERENCE

INNOVATION IN ACTION.

For more than 37 years, Inoac Packaging Group has been a trusted partner to brands, turning bold ideas into beautiful packaging. We combine innovation and action to deliver one of the industry's most extensive selection of materials, components, and decoration solutions.

In a crowded marketplace, your packaging should do more than just contain - it should captivate. Whether you need end-to-end support or a more flexible, hands-off approach, we're here to bring your vision to life.

WHAT WE CREATE

COMPONENTS OFFERED:

- BOTTLES
- JARS
- ORIFICE REDUCERS
- SNAP OVERCAPS

MOLDING TECHNOLOGIES:

INJECTION STRETCH BLOW MOLDING (ISBM)

This molding method is a go-to choice for brands looking to elevate their packaging. It offers exceptional clarity, sleek aesthetics, and design flexibility—perfect for creating a premium look and feel that stands out across skincare, personal care, and beyond.

EXTRUSION BLOW MOLDING (EBM)

This molding method offers the perfect balance of form, function, and flexibility. Known for its cost efficiency and adaptable tooling, EBM is a smart choice for brands looking to scale with speed—delivering everything from squeezable designs to bold, custom shapes without compromising performance or shelf appeal.

INJECTION MOLDING (IM)

We utilize IM to produce precise, durable snap-on overcaps and orifice reducers that provide a seamless fit and reliable functionality. With fast production times and consistent quality, IM ensures your packaging performs flawlessly—every time.

FINISHING TOUCHES

In-Mold Aesthetics:

- Embossing
- Debossing
- Texturing
- Translucent Color
